Reactis V2010.2
Released November, 2010

New Simulink Support

- ► MathWorks R2010b models
- ► Enumerated data types
- ► Models using self-modification commands such as set_param
- ► Rounding modes Convergent, Round, and Simplest
- ► Stateflow operators hasChanged, hasChangedFrom, and hasChangedTo
- ► The Vector Concatenate block

Reactive
Systems, inc

Leverage of multi-core architectures to achieve faster test generation.

New Toolbar

Reactis for C Plugin

- ▶ New buttons in the toolbar offer improved control when stepping through C code:
  - ▶ step into a function
  - ▶ step out of a function
  - ▶ step over a function
- ▶ More ways to observe data values:
  - ▶ Variables in C code can now be added as watched variables
  - ▶ Scopes can be opened for global variables in C code.
