Reactis V2015.2

Released December 18, 2015

New Simulink Support

- ► R2015b.
- bind actions in Stateflow
- Extended subset of Embedded MATLAB® (EML)
 - Statistical functions: std, mean, var.

Validator Enhancements

- Link to requirments documents from Validator objectives.
- Drag-and-drop wiring of Validator objectives.

API Improvements

- MATLAB wrapper functions greatly simplify using Reactis API from MATLAB.
- New functions:

rsExtractSubystem extract a subsystem from a model to test at a lower level.

rsSetParameterValue set model-specific search path, and pre- and post-load functions.

rsRsiDefaultInputs reset constraints on top-level inputs in an .rsi file to their original settings.

Other Enhancements

- Added option to produce a warning (instead of error) when a inf/nan value, integer overflow or integer saturation is detected.
- Start Reactis and load a model by double-clicking on a .rsi file

Thank You!
